Re: Irish Cob Society agreement with France Irish Cob

To whom it may concern,

This is to confirm that the organization France Irish Cob is the official representative organization for the Irish Cob Society (ICS) in France.

Following inspection by the Department of Agriculture (DAF), the ICS was approved on 12th December 2007 to maintain the Stud Book of Origin for the Irish Cob breed from 1st January 2008. The DAF inspection of the ICS included an office inspection where the DAF was satisfied that the ICS had sufficient office equipment and data base to allow the ICS to provide an efficient service, including the issuing passports for Irish Cobs entered in the ICS Irish Cob Stud Book. The data base programme licensed to ICS, which has been approved by the DAF is called Breeders Assistant. A trial version of the Breeders Assistant can be downloaded free from the internet site www.tenset.co.uk

Yours sincerely

Evelyn Flynn
